\*Version: 3.0

### **Device or Interface:**

N/A

### Symptoms D

### **Problem Type:**

- You want to install Net Report on a Production Server without having to upgrade to Internet Explorer 6.
- By default, the installation procedure looks for Internet Explorer 6.
- By default, the installation procedure needs Windows Installer 2.0.

Replication Context:	
N/A	
Error Message:	
N/A	

### Net Report Answer

\*Cause: N/A

**Resolution or Work Around:** 

Editing the NetReport[Solution Name].msi file

**Note:** if you need to install ORCA, please refer to Article 00017: How To Download and Install ORCA.

**Steps** 

Decide which Net Report solution you want to install. How?
 In the Net Report setup directory the solutions are listed as follows:

- **all** directory: contains Net Report.msi: the complete Net Report Solution.
- **console** directory: contains Net Report(Management Console).msi: only the Net Report Management Console.
- **engine** directory: contains Net Report(Engine).msi for the Net Report Engine without the Web Portal.
- **portal** directory: contains Net Report(Portal).msi for the Net Report Web Portal only.
- 2. Launch Orca.exe to edit a Net Report[Solution Name].msi.
- 3. Select the setup directory where Net Report has been installed.
- 4. Select File> Open...
- 5. Open the \*.msi file at: c:\..\Master\_NR[Version Number]\setup\ Net Report [Solution Name].msi.

The NetReport[Solution Name).msi opens.

6. Select the LaunchCondition table from the Left Tables Pane. Show Me!

10. Select **File>Save** to save the changes you have made.

### Editing the setup.ini file

### **Steps**

- 1. Select **Start> All Programs> Accessories> Notepad** (or another text editor).
- 2. Select File> Open...
- 3. Open:

c:\..\Master\_NR[Version Number]\setup> Net Report [Solution Name]> setup.ini.

The setup.ini file opens.

4. Search for the entry: MsiVersion=2.0.2600.0 in the Startup section. Show Me!□
