Question:

What's New in Net Report Version 3.11?

Net Report Answer

Web Site Content Type Categories

- ☛ Aggregated Proxy Dashboards now provide Web Site Content Type Categories when the Proxy provides information.
- ☛ Examples of Web site content type categories include: Information Technology, New Media, Shopping and so on.

New Proxy Report Books

- ☛ Two new report books, one featuring statistics with Users detailed and the other featuring statistics with IP Addresses detailed.
- ☛ Four new Individual Reports.

Aggregated Firewall and Proxy Dashboard Navigation

- ☛ Easy browsing from day-to-day and month-to-month between Aggregated Firewall and Proxy *.pdf dashboards.
- ☛ To do so, you must name the *.pdf files created according to a specific format.
 - The file names must be: Firewall_Monthly_YYMM.pdf and Firewall_Daily_YYMMDD.pdf for Firewall Dashboards.
 - The file names must be: Proxy_User_Monthly_YYMM.pdf or Proxy_User_Daily_YYMMDD.pdf for Proxy Dashboards featuring Users.
 - The file names must be: Proxy_IP_Monthly_YYMM.pdf and Proxy_IP_Daily_YYMMDD.pdf for Proxy Dashboards featuring IP Addresses.

Note: this naming format should be only be applied to Net Report versions installed from the NR3.10 FINAL Release and later (that is versions published from November 2, 2004 onwards).
If you are using a version which is earlier than the NR3.10 FINAL Release, please use the following file names:
- firewall statistics_YYMM.pdf

NET REPORT

- general firewall statistics_YYMMDD.pdf
for Firewall Dashboards

- general proxy statistics_YYMM.pdf
- general proxy statistics_YYMMDD.pdf
for Proxy Reports.

Database Script Management Options

- ☞ You can now benefit from a new feature in the Net Report Configuration Wizard where you can choose to customize the Database scripts generated (Objects creation and modification) and manually execute them.
- ☞ This feature is highly beneficial for Database Administrators (DBAs) who want to modify the default database scripts generated by Net Report.
- ☞ For example, for an ORACLE database, you can specify a specific table space for the Net Report User and so on. You can then manually execute the scripts.

New Web Portal Net Report Utilities Menu

- ☞ The new NetReport Utilities menu is created by default and can be accessed by Administrators.
- ☞ This menu includes two Projects: Firewall Statistics Utilities and Proxy Statistics Utilities.
- ⓘ Note: the FireWall Statistics Utilities and Proxy Statistics Utilities Projects replace the former Version 3.10 Firewall/Proxy Aggregated Detailed Projects that were available to all users.

Information: Version 3.10 FINAL (published on November 2, 2004) was already installed with the Firewall/Proxy Aggregation Process Status Reports, however, they were not copied to the menus in the Net Report Web Portal.

- ☞ Administrators and Operators can benefit from the following reports which are included in the FireWall/Proxy Statistics Utilities Projects:
 - Selected Record Details.
 - Number of Records in the Firewall/Proxy Table.
 - Firewall/Proxy Aggregation Status: checks the duration and correction termination of automatic Aggregation sessions.

NET REPORT

Bug Fixes

- The following bugs have been corrected in Net Report Version 3.11:
 - Unexpected lengthy *.pdf Report Generation Pre-Display Errors: occasional errors occurred for *.pdfs with significant generation times when created via the Net Report Web Portal. These errors have been fixed in Net Report Version 3.11.
 - Net Report Web Portal access rights error on Windows XP SP2 and NT4: Net Report Version 3.11 now directly installs on these Operating Systems, without any additional configuration.
 - Windows Installer (MSI) prompts for a repair of the installation after the sample PDF file copied in the Scheduled Reports has been removed. This error has been fixed in Net Report Version 3.11.
