Question:

What Net Report Files Should I Backup?

Net Report Answer

Introduction

This Article explains the files and directories to backup for Net Report. Note this document gives the directories which Net Report proposes by default, please replace the directories as appropriate. Please note that the default Net Report drive is drive C, if you installed Net Report on another drive then replace drive c which is used for the paths in this document by the appropriate drive.

Net Report Spied Directory Backup

Backup the log files in the directory you selected for Net Report to scan via the Net Report Configurator or the Net Report Management Console.

Net Report Database Backup

Backup the netreport database.

Net Report Configuration Backup

If you used the Net Report Configurator: then the Net Report configuration you parameterized will be automatically backed up when you click either the **Apply** or **OK** buttons in the Net Report Configurator. Net Report will automatically create a directory (YYYYMMDD-HHMM-wizard-vXXX) with your configuration in the following directory:

C:\Program Files\NetReport\NetReport\ConfigurationBackup

If you performed an advanced configuration via the Net Report Management Console:

then you must click the **Backup** button to save this configuration in the following branch in the Net Report Management Console:

Console root> NetReport> localhost

Net Report will create a directory (YYYYMMDD-HHMM-user-vXXX) with your configuration in the following directory:

C:\Program Files\NetReport\NetReport\ConfigurationBackup

Net Report Log Storage Files Backup

Backup the files in the following directories

C:\NetReportStorage

 **Note:** The environment variable %NETREPORT_STORAGE% Environment Variable defines the default directory for Net Report Log Storage Actions.

 **Note:** Log Storage generates files in Native and/or Enriched CSV Format for temporary storage before they are archived by Net Report Log Vault. Log Storage does not treat other Flat File Logs which can be directly archived in the Net Report Archive Directory.

Net Report Log Archive Files Backup

Backup the log archive files you selected to store over the long-term (for example for seven to 10 years) in the Net Report Log Vault

C:\NetReportArchives

Net Report Dashboards Backup

Backup the directories in which you have saved all non-default *.wfv files which you may have installed or modified via the Net Report Tool Kit, Net Report Device Support Center...

If you have set scheduled Dashboard generation tasks via the Net Report Web Portal then backup the following file:

C:\Program Files\NetReport\WebPortal\d7tasks.xml
